

SEN. NIQUETTE: Without it going to the Health Department, you have no bill.

SEN. MANDIGO: I don't—

SEN. NIQUETTE: This is the second year around. Tried both times, and by God, we will lose the second time.

SEN. MANDIGO: I don't understand why. I realize that it might have to go to the General Committee, and it might take another year out of the bi-ennium but I see no reason why it could not be completed next year.

SEN. HARWOOD: I suggested to the chairman that you might put an amendment on this, sort of a fail safe thing. If it is not working at the end of a year, the bill is repealed.

SEN. MANCHESTER: It will take them a year to get the thing reorganized. They will be reorganizing it for a year.

SEN. HARWOOD: I thought that I could sell it to you that way. (laughing)

SEN. NIQUETTE: I was talking to Madeline about—you probably know Melvin. Last week we had it on one bill, that you can deal with it next year, and change it around if you want to.

SEN. MANDIGO: Standard exemption.

SEN. NIQUETTE: All we have to do is call Bill, and Bill puts it on.
